

DUST SEPARATOR DSA-38

Removes dust and foreign matter from plastic pellets

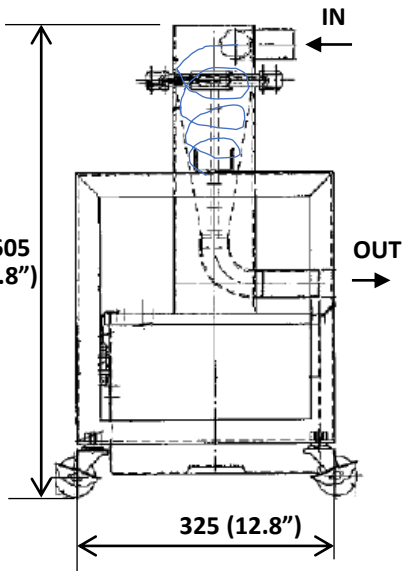

Benefits

- The labor required to clean the conveying filter is significantly reduced.
- Improves part quality by removal of dust and foreign matter.

Product outline

- Installation is as simple as connecting to a raw material conveying hose - Inner diameter 38 mm (1 ½").
- The collected powder accumulates in the lower bucket.
- Able to use any raw material conveying equipment, such as a dryer, by any manufacturer.
